**Health**esystems**™ Presents Informative Seminar on Managing Prescription Drug Costs at the Texas Workers' Compensation Forum**

Tampa, FL - Health**esystems** LLC (Health**esystems**), a leading provider of medical cost management solutions for the workers' compensation industry, recently presented an informative seminar titled *Managing the Rising Cost of Prescription Drugs in Workers' Compensation* at the Texas Workers' Comp Forum held in Dallas, TX.

The engaging seminar presented by Daryl Corr, President of Health**esystems** and Dr. Michael Seise, PharmD, MBA provided valuable clinical insight into the prescription drug market and the drivers behind increasing costs. With drugs representing upwards of 15% of the total medical cost for workers' compensation payers, combined with the increasing severity and complexity of workers' compensation claims, the timely seminar focused on solutions to improve medical outcomes and reduce costs.

"Our statistics show that 7% of injured workers receiving medications represented 56% of our payer's total drug spend," stated Daryl Corr, President of Health**esystems**. "This finding illustrates the need for payers to use a pharmacy program that applies a proactive clinical management approach to the most complex cases to maximize pharmacy savings."

Health**esystems** has found that targeted clinical intervention programs are a key factor in addressing the most severe workers' compensation cases. In addition, the use of evidence-based guidelines when interacting with prescribing physicians assists clients with reducing pharmacy spend while providing the most appropriate care for the injured worker.

Health**esystems** is a specialty provider of innovative medical cost management solutions for the workers' compensation industry. The company offers a diverse suite of services including a leading pharmacy benefits and clinical management program as well as a prospective adjudication solution for managing ancillary medical services. Leveraging powerful technology, clinically-based outcomes management expertise and enhanced workflow automation tools, Health**esystems** provides clients with flexible programs that reduce total medical expenses while increasing the quality of care for injured workers.

Expert clinical services. Exceptional technology. Extraordinary results.
